DESIGNER
STEPHEN WALTER

Stephen's drawings are a tangle of signs, words and images that draw the viewer into the artist's intricate worlds. A graduate of Manchester Metropolitan University and the Royal College of Art, he is best-known for his series of hand-drawn maps, done in enormous detail and layered with both visual and textual information. Each work is an intricate world in itself; a tangle of words and symbols that make up a complex of hidden meanings and wider contradictions. Through drawing, photography and print making, his artworks explore the meaning of objects, the glory of maps, our place in the world, and the potential legacy that we bequeath to future generations.

Please note that some of Stephen's designs contain colorful language and adult themes.
