

# CUTTING A RUG

---

A beautiful example of Chateau Danse used as carpet in a field of Calacatta Gold 12x12's - consider the skill and man-hours required to achieve this perfectly balanced installation!

This 'rug' represents 20-individual mosaic units (13 3/4" x 13 3/4" with many fine details). The installer would have to handle every unit - lay it out - mark it for cutting - transport back-and-forth to the wet-saw, thereby increasing the risk of breakage and cutting errors.

*Artistic Tile is pleased to introduce a valuable service for you and your clients when faced with similarly challenging installations:*

## ARTCCOOFMCP

The max carpet size is 4' x 8'.

The price includes the following:

- Layout based on customers measurements (unless a template/orientation is provided by client)
- Cutting of material
- Fill in of edge pieces
- Face tape of entire carpet
- Crafting of carpet (the carpet will be shipped as a unit in 1 layer on a sheet of MDF lying flat)
- Standard lead time applies
- F.O.B. Secaucus, NJ
- Carpet Cutting is not available with stocked Jazz Glass Mosaics.
- Tailored To Jazz Club Water Jet patterns may be Carpet Cut.

No CAD or drawings are included in this price and are not part of this service.

Individual mosaic units are assembled on our waterjet machine. Layout based on measurements and/or template provided by client/installer/contractor - no site work by Artistic Tile is included in this service.

# CUTTING A RUG

---

In this instance the installer provided template is placed over the assembled mosaic and adjustments are made as needed to ensure a balanced layout.

The waterjet machine is used to trim the edges. Cut pieces from one side are put in place on the opposite side - optimizing the use of the material.

The entire assembled rug is face-taped, place on 1-layer of MDF and crated, lying flat.  
F.O.B. Secaucus, NJ

- Special thanks to installer Colin Sherlow for sharing his photographs.
