

CFIBER©

CF

cFiber© BATHROOM FAUCETS

Highly corrosion resistant, carbon fiber is ideal for environments routinely exposed to water, cleaning products and chemical agents.

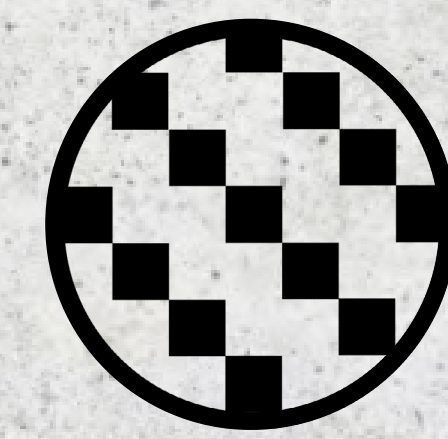

With an easy to use single lever handle that controls the water volume and temperature controls the volume and temperature controls, the VIGO cFiber© bathroom faucets bring effortless use through high-end style.

VIGO

cFiber©

10X stronger and 5X lighter than steel, carbon fiber's strength to lightness ratio previously made it the go-to for building automobiles and airplanes.

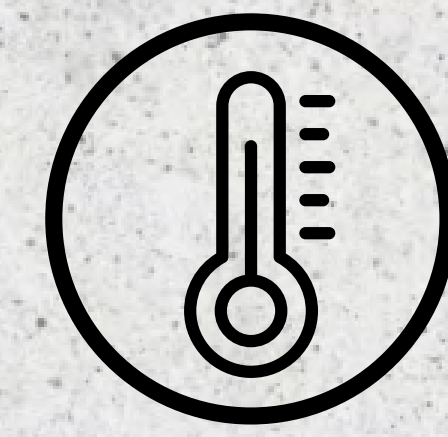

EXCEPTIONAL STRENGTH

Revolutionary material previously used to make airplanes and automobiles provides exceptional durability and strength.

7-LAYER COATING

7 layer coated premium finish expertly resists rust, corrosion, and tarnish for longevity and resilience.

LOW THERMAL EXPANSION

A coefficient of thermal expansion, carbon fiber remains still and retains structure despite exposure to heat.

EASY TO INSTALL

Single-hole installation and standard US plumbing $\frac{3}{8}$ " connection. Standard 1 $\frac{3}{8}$ " diameter opening is required for this faucet.

BUILT GREEN

Eco-friendly 1.2 gpm flow rate lowers both your water and energy bills without sacrificing water pressure.

DURABLE CONSTRUCTION

Constructions of faucet body with premium finishes, which exceed corrosion and tarnish, exceed industry durability standards.

CERTIFIED SAFE

cUPC, NSF-61, NSF 372, AB1953, CEC, and WaterSense certified by IAPMO R & T; ADA compliant.

LIMITED LIFETIME WARRANTY

The VIGO Limited Lifetime Warranty covers customers for the life of their product based on manufacturer's defect.
