**RAD designs
and manufactures
furniture that
is built to last in
Los Angeles, CA.**

**Our intention
is simple:
to make better
furniture.**

When we opened RAD in 2010, our earliest clients were family and friends. Their needs defined our approach, our designs, and ultimately, our community-driven ethos. It was important then, just as it is today, to make furniture with integrity.

Today our clients range from local coffee shops to global businesses, and though we've grown and evolved, our roots are very much the same.

Only the Necessary

We believe the best designs often yield uncomplicated results. This attitude drives us to design with purpose, prioritizing simplicity in our product development and manufacturing.

LA Made

RAD is proud to call Los Angeles home. We strive to continue to grow in order to employ more Angelenos and provide a creative, fun, and balanced work environment.

Built to Last

Furniture that is built to last is inherently sustainable. As designers and manufacturers, we are responsible to create products that serve a purpose, build them to last, and continue to evolve our manufacturing practices to best protect our environment.

Coated Steel

Signature Table and Bench
Powder Coated Steel

Cafe Table on Weighted Base
Powder Coated Steel

Signature Cafe Chair
Powder Coated Slatted Steel

Materials / Sustainability

Materials and Sustainability

Manufacturing locally allows us to achieve efficiencies in production and material use, thereby limiting our waste and enabling us to recycle scrap. All steel and aluminum scrap is recycled. It also enables us to source materials on a per-project basis depending on a project's requirements, whether that means sourcing a particular FSC-certified wood or using the lumber of local fallen trees.

Because all of our products are manufactured in Los Angeles, the distance of travel - for our materials and our products - is minimal. We customize every shipment to guarantee efficient use of cargo space in transit, as well as to ensure product arrives in perfect condition to avoid wasteful replacements. Finally, our centralized production allows us to employ local skilled manufacturing professionals, pay them with living wages, and promote work-life balance and a high quality of life.

| | |
|-------|---|
| Metal | Steel is a readily available, endlessly recyclable material known for its strength and durability. Because it is near unbreakable, the majority of our chairs can support up to 600 pounds. Our steel is sourced from domestic and non-domestic sources depending on accessibility, and the aluminum used for some table surfaces is sourced domestically. All scrap metal is recycled. |
|-------|---|

| | |
|-------------|--|
| Powder Coat | Because it is applied electrostatically, no particles are emitted into the environment during application. Powder coat resists chipping and scratching, which ensures a long lifespan. Steel can be re-coated if needed, indefinitely prolonging a product's lifespan. |
|-------------|--|

| | |
|-----|---|
| Ash | FSC-certified and sourced from Pennsylvania, USA. Recyclable and compostable. |
|-----|---|

| | |
|-----------|--|
| White Oak | Domestically sourced in the USA. Recyclable and compostable. |
|-----------|--|

| | |
|-------------------|--|
| White Oak Europly | Sourced from the USA and Canada. FSC-certified; Rainforest Alliance Certified; VOC and Urea-Formaldehyde-free. Recyclable. |
|-------------------|--|

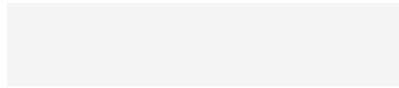

| | |
|--------|---|
| Kebony | Sourced from Norway and Belgium. FSC-certified; PEFC-certified. Recyclable. |
|--------|---|

| | |
|-------------|---|
| Wood Finish | Because our outdoor wood does not require finish, no maintenance beyond standard cleaning is necessary. Our indoor woods receive a low-VOC polyurethane finish, chosen for its durability and low impact on the environment during application. |
|-------------|---|

| | |
|-----|---|
| HPL | Manufactured in Wisconsin, USA. CARB-certified; formaldehyde-free; and manufactured in a BIFMA Level-certified plant. |
|-----|---|

| | |
|---------|---|
| Acrylic | Manufactured in Texas, USA. Greenguard-certified. Recyclable. |
