WHAT IS IT?

Our Preserved Moss Walls are created from real moss harvested sustainably from forests and tundras around the world. It is put through an industry-guarded process that allows it to retain its soft, flexible organic texture while extending its life span to up to 10 years without **water** or **sunlight**. There are several types of preserved moss that we use to craft unique, maintenance free designed in commercial spaces across the U.S..

This material can be installed in any space, to any dimensions and follows standard building code requirements.

OUR MOSS TYPES

We use four types of preserved moss, this enables us to provide a spectrum of designs from simple walls to forest-like creations that look like they're growing right from the walls.

POLE MOSS

(or 'bunn' moss)

A dimensional moss that is perfect for creating a textured 3D effect in a design.

NRC RATING = .90

Starts at \$104.50 per square foot

PILLOW MOSS

The tallest moss variety we use, pillow moss has a unique texture and creates a lush appearance. Pillow moss is subtle and perfect for a true 'forest' look.

NRC RATING = .70

Starts at \$104.50 per square foot

FLAT MOSS

Makes for a clean, simple look that looks best when paired with other moss types. It is also the most resilient moss that holds up well to foot traffic.

NRC RATING = .65

Starts at \$90 per square foot

REINDEER MOSS

One of our most versatile Moss types that can be used in detailed designs such as logos, angles, and more.

Available in up to 14 colors.

NRC RATING = .55

Starts at \$97.50 per square foot

Our core motivator: **Biophilic Design.**

This is a design concept based on the research that humans have an innate tendency to seek out natural environments (*biophilia*), and that nature-inspired environments have a measurably positive effect on us, even in the span of a few minutes.

Moss is one of our key approaches to reshaping the indoor experience for Human Wellness.

BENEFITS OF BIOPHILIC DESIGN

PROJECT SCOPE

We do a thorough consultation with our clients: We seek to understand the project needs, providing relevant guidance and solutions.

DESIGN

After a consultation, you have the option to request an in-house rendering of what the final product could look like. This is a great tool to present to clients, stakeholders, and your team.

BUILD

Once everything is finalized, our in-house team gets to work on bringing your project to life. We provide progress updates and photos to ensure you are always up to speed.

DELIVER

We can ship our products anywhere in the continental U.S.. We will ship your moss wall and handle the installation if needed.

HOW IT'S MADE

1 Your Project Space

You have a project that you'd like to use a moss wall in.

DESIGN OPTIONS

We make the process easy with a selection of premium design options to get you started in the right direction.

SOLID MOSS

ORGANIC MIX

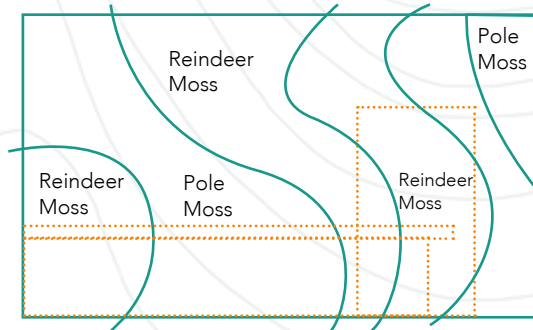

GEOMETRIC

NATURAL FLOW

2 Moss Design

We help you craft a design if needed, and create technical drawings.

Proposal One

Materials

Proposal One Details

3 Moss + Substrate

We create the moss wall on a felt substrate according to your project specs.

FELT BOARD

This is our typical substrate. It supports the moss while keeping the weight of the overall installation lighter and enhances the acoustic properties. It can be modified easily on installation and flex to follow curved walls.

WOOD

BALTIC BIRCH PLYWOOD

A wooden substrate is a great option for rigidity and essential for mounting signage on moss. This is typically used in our framed moss wall style. All of our frames are crafted in-house, and can be stained to the color of your choice.

Baltic Birch is only used for projects 3' x 7' or smaller.

4 Project Results

Your moss wall is shipped and installed, green and vibrant for 10+ years.

OUR BUSINESS

Green Oasis is a Family owned and operated company and since 2008, we have grown from commercial plant services to providing clients all over the country with custom biophilic installations.

Our deepest belief is that people and nature belong together, and making our indoor world a better place with plants is an important step to overall human wellness.

The world is changing and the spaces where we live and work are being entirely reimaged. Let us help you design the beautiful, effective space you want to create.
