Specialty Vertical Markets

Globally Proven Construction Solutions

Get to know LATICRETE,
our people, our values
and our nearly 7 decades
of innovation.

Our Company

LATICRETE is a 3rd generation family-owned, customer focused, worldwide manufacturer of green flooring and facade materials, used in residential, commercial and industrial applications.

For nearly 7 decades, LATICRETE has provided the technology, products and service – making innovative, permanent installations and repairs for the construction market worldwide.

Architecturally specified and professionally endorsed, LATICRETE offers a dedication to quality that results in globally proven solutions for virtually every flooring, waterproofing and facade application.

Partner with trusted and experienced LATICRETE Sales Specialists dedicated to help provide everything needed from a comprehensive system warranty package to superior service.

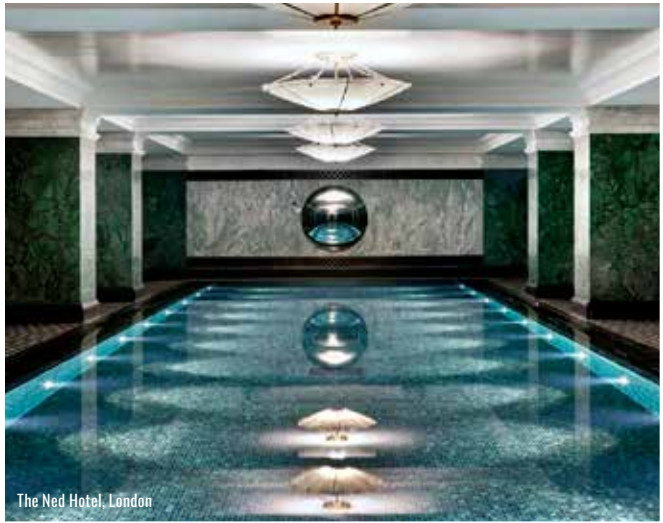

As LATICRETE continuously sets benchmarks for quality and innovation, the company has grown to employ a workforce of nearly 2,000 [EF1] associates worldwide and operates in and distributes to every continent, with eight plants in the United States including its headquarters in Connecticut, as well as facilities in Brazil, United Arab Emirates, China, India, Singapore, Australia, Norway, Italy, Mexico and Costa Rica. [EF2] [CS3]

“Our global reach allows us to be a local company in every community we serve, providing unmatched performance and support while remaining on the forefront of trendsetting developments.”

— David A. Rothberg, Chairman of LATICRETE

LATICRETE® system solutions have been used in the most prestigious and most demanding buildings in the world, from the One World Trade Center and the metro transit systems in New York City to the world’s tallest buildings including the Burj Khalifa in Dubai and the PETRONAS Towers in Kuala Lumpur, Malaysia. The Olympic swimming pools in Beijing were all done with the LATICRETE system, as was the dramatic Marina Bay infinity pool that sits atop a 50-story tower in Singapore. No other manufacturer in the world has this track record.

Successful Partners

LATICRETE has dedicated Strategic Account Specialists for every vertical market we serve. Supported by technical field representatives who are proactive in preconstruction planning and jobsite installation training. LATICRETE professionals will provide supply chain logistics ensuring installation success and unmatched product system performance. Including, working directly with your construction teams, general contractors and subcontractors to provide Lean Construction best practices while delivering real value in saving time and labor where many of our products install both safer and faster.

Services Include

- Specification consulting
- Detailed drawings
- Product mock-ups
- Value-add product bundling
- Anti-microbial additives available
- Identify and track project schedules
- Supply chain logistics
- Local job site support
- Industry leading warranty
- Worldwide availability
- Designated Strategic Account Specialist

Vertical Markets We Serve

- Healthcare
- Senior Living
- Multifamily
- Residential
- Hospitality
- Education
- Retail
- Convenience Store
- Restaurants
- Automotive
- Fitness Centers

Building System Solutions

Since 1956, LATICRETE has led the industry with pioneering advancements—developing high-performance building materials for architects and construction professionals worldwide. From time-tested to ground-breaking, our broad product portfolio provides superior quality and value. We are fully committed to innovation, growth, and a complete system component approach.

Tile & Stone Installation Systems Including Tile, Stone & Surface Care

Ensure a successful installation every time with the most comprehensive selection of innovative tile and stone installation materials available worldwide. LATICRETE® products provide complete system solutions from the substrate up through the grout, after all, we invented thin-set. All, on any type of installation in commercial, industrial, and residential applications including water based surface care products that protect you and all natural stone, tile, quartz, porcelain, vinyl and laminate products.

CSI Division 9

Concrete & Substrate Preparation

A quality finished floor starts with a professionally prepared subfloor, one that guarantees a long lasting, durable installation. Our project tested NXT® surface preparation products are formulated to protect finished floor goods from cracks, moisture vapor and sound transmission. Providing a perfectly flat substrate — ensuring faster installations and longer floor goods life-cycles. And for large volume self-leveling projects, the SUPERCAP® System is a proven time saving, cost-effective system for finishing new concrete or capping existing slabs and is UL GREENGUARD Gold Certified.

CSI Divisions 3 & 9

Resinous Coating & Floor Finish Systems

SPARTACOTE® flooring offers seamless, safe, highly durable and easy to clean solutions to meet the most demanding flooring challenges. With tailored systems for industries ranging from Healthcare to Restaurants and everything in-between, SPARTACOTE systems help reduce downtime through innovative, quick return to service products proven through years of successful installations. A variety of available textures, finishes and colors allows customization to match any decor.

CSI Divisions 3 & 9

Adhered Façade & Wall Finish Systems

Keep up with the increasing popularity of adhered masonry veneers. Designed to deliver superior, long-term performance on masonry projects of all types, our revolutionary Masonry Veneer Installation System (MVIS™) is engineered to provide a permanent, high-strength installation. Using an industry leading waterproofing air and water barrier membrane that protects against air and water penetration in both exterior and interior applications. Another industry first that is innovating how buildings are being built better.

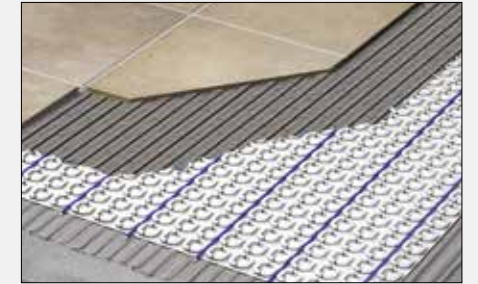

CSI Divisions 4 & 7

Shower Installation Systems

The HYDRO BAN® shower system provides everything you'll need for a worry-free installation. As a single-source supplier, LATICRETE offers waterproof membranes, shower pans, benches, niches and drains all with the trusted performance expected from the HYDRO BAN line. Complete your shower by choosing a variety of LATICRETE adhesives, grouts, sealants and caulks for a beautiful installation that is backed by the industry's best warranty.

CSI Division 9

Radiant Floor Heating

The STRATA_HEAT™ floor heating system is the most advanced radiant floor heating system available in the world. Consisting of a high-performance floor heating wire, an uncoupling mat, two WI-FI enabled thermostats and the world's first heat conductive thin-set additive — the system provides you with the most advanced and efficient floor heating system for your next installation.

Cornell Tech Campus, Roosevelt Island, NY

Advances in healthcare technology are changing the way medical care and research facilities are being built. These buildings are facing revolutionary transformations affecting the delivery of efficient, around the clock patient-centered care. Optimal patient and staff safety are paramount as are increasingly successful patient outcomes. Much of the future is flexible space – first and foremost, new healthcare projects are being initiated in response to local population growth and needs. Contagion-control and safety protocols put in place during the pandemic are becoming standard for new projects and renovations. Facility re-evaluations have opened doors for more flexible design options that include adaptive reuse. Such as converting a vacant government office building to an inpatient hospital whose units are flexible: they can be made into single 24-bed units or rearranged to include two or three times that number of beds. And large, empty retail buildings are usually in the right locations for adaptive reuse to healthcare facilities. Regardless of their determinations about space, owner-operators are more concerned than ever about making their facilities as germ-free as possible. As a result, many LATICRETE® products are now available in anti-microbial formulations. Consult your Strategic Account Specialist for additional information.

LATICRETE offers complete system solutions designed to enhance the quality, durability and rapid-return-to-service of the various applications within a healthcare facility. Our dedicated sales and technical representatives can help with specifying the best products and installation systems, simplifying the build process while providing owners with unified, single source warranties.

Healthcare

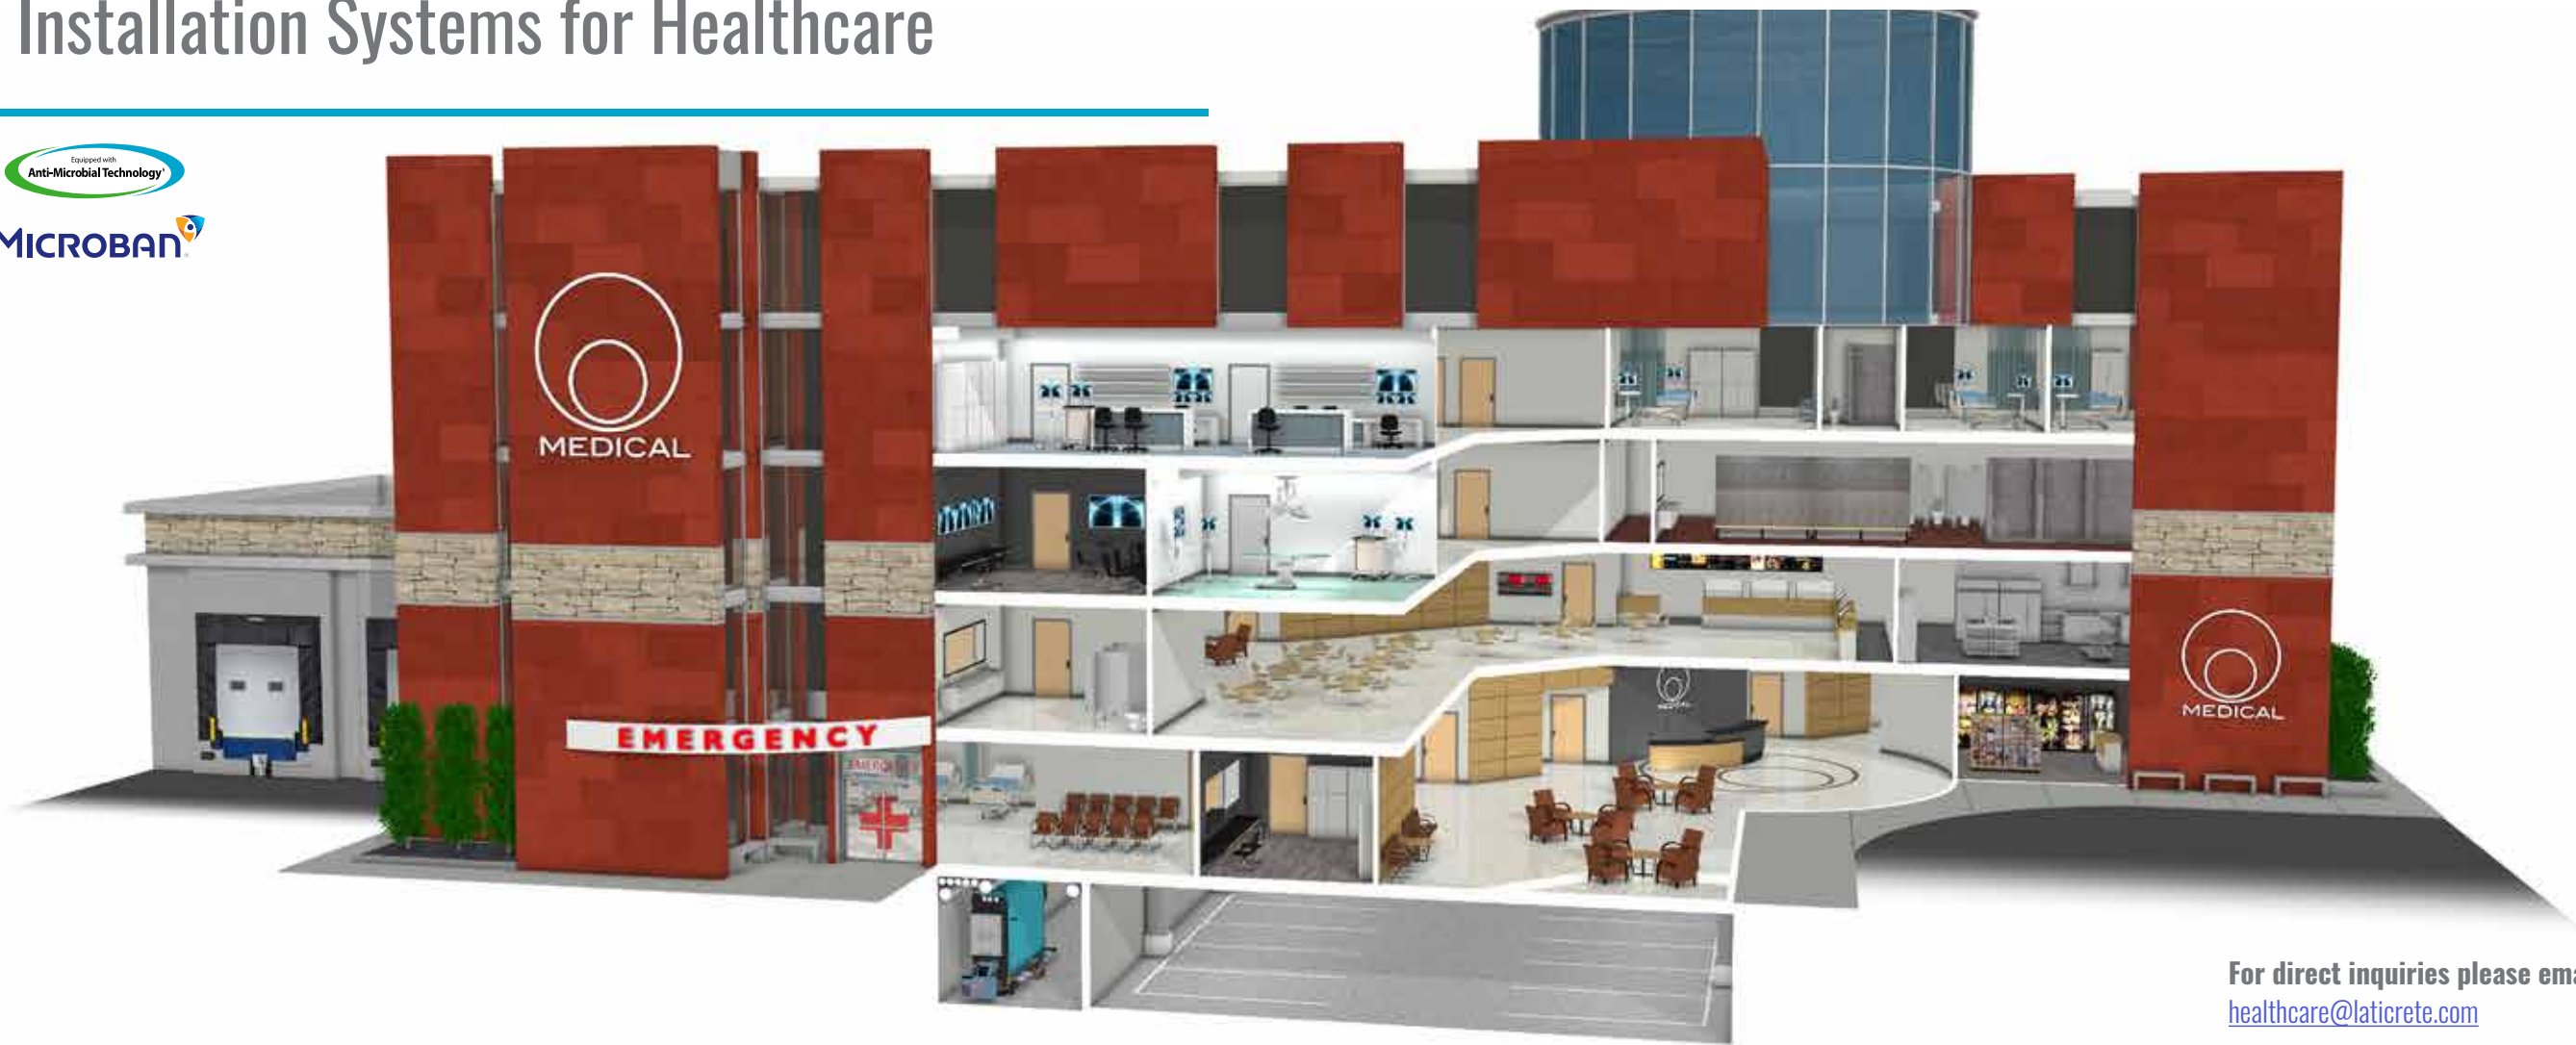

LATICRETE® product and installation technologies are vital in achieving the largest and tallest Passive House building in the world at the Cornell Tech Campus on Roosevelt Island, New York City.

Passive House is the strict international building standard that drastically reduces energy consumption while creating a healthier and more comfortable living environment.

Higher education institutions are planning for a future that includes fully engaged students and campuses bustling with activity. Architectural and engineering firms are focused on renovation, modernization, and major new construction of everything from life science facilities to theaters. Science and research, business, engineering, computer science, libraries, arts and general classrooms lead the renovations and new facility construction focus. Recent benchmarking indicates that over half of colleges and universities are reviewing their campus master plans. A LATICRETE dedicated Strategic Account Specialist will help you specify product systems delivering performance and value for decades to come.

A Senior Living environment has some of the most complex needs of any built environment. It's a place to call home, a place to nourish bodies and minds, a place to receive care and a place to make friends. Whether you have a new construction, remodel or renovation project, you want it to be architecturally pleasing and you want it to perform and be a safe place for those we love and care for. It's a complex system, so you want a comprehensive system supporting your design. That's where LATICRETE can help and be a partner. We build those systems that support your finish materials, giving them the best opportunity to perform the way you intended.

Multifamily housing continues to address a full range of price options. While higher-end products remain the most attractive, there is a trend to design and build quality mid-level properties that accommodate home offices for millennial tenants and buyers. Developers want single-source suppliers, rapid curing installation systems and industry leading warranty protection. LATICRETE delivers all these benefits including specification writing support, system bundling for value, supply chain logistics, on site technical and installation support and a wide product range. Most of all, saving time on construction schedules while specifying best-in-class products means you have more to sell in less time.

Hotel guests deserve the very best a hospitality brand can offer. In both front-of-the-house and back-of-the-house, cleanliness and durability cannot be overstated. Maintaining appearance while withstanding continuous heavy use is expected. From guest rooms and baths to public areas, food prep, service and dining, spas, gyms, swimming pools and fountains are all customer experience encounters that reflect the value and trust the brand offers. Facilities must be fresh, clean and in trend in every way. Renovations must have rapid turnarounds with minimum disruption to guests and owners. Installing LATICRETE® professional grade products supports your hotels' promise to deliver the very best, every day.

Changing Physical Spaces – With the growth of takeout and delivery, many restaurants have reduced the footprint of their dining room to dedicate more space for cooking, preparing orders and storing fresh supplies. The acceleration of digital will also make curbside pickup windows and lanes more relevant. Focusing on cleanliness and delivering a reliable, trustworthy experience will keep customers coming back. Restaurants have always had compliance requirements from municipal health departments. Today, restaurants are doubling down on these efforts. Customers are looking for restaurants to be transparent about their cleanliness procedures. LATICRETE has experienced and dedicated Strategic Account Specialists to help you specify product systems that will help keep installed finishes looking great, withstand constant cleaning including many products that have anti-microbial additives.

Restaurants: Front of House

Restaurants need attractive flooring that's inviting to guests but also durable enough to withstand constant use and cleaning. LATICRETE has solutions that meet and often exceed the demands of the food service industry.

Commercial Kitchens:

Commercial kitchens can be very harsh environments for tile installations. The constant cycle of fatty and acidic food buildup—and continual scouring and steam cleaning—can damage surfaces over time. Selecting the right system of installation products is the recipe for success.

LATICRETE is a world-wide manufacturer of flooring products for retail and many other commercial applications. Products include tile and stone setting materials, surface preparation, decorative and resinous floor coatings, and masonry veneer installation systems for facades. Our dedicated Strategic Account Specialist will support your teams throughout the life cycle of each store location worldwide. They will help you specify the right mix of products, assist in training for construction teams and contractors, work through project tracking, provide local technical support and ensure owners receive the best warranty protection in the business. With eight manufacturing, warehouse and shipping locations and 100's of distributors across North America, you are assured of a rapid supply chain response, helping to keep projects on schedule. LATICRETE® products help you finish your jobs faster and safer to minimize disruption and downtime by specifying rapid curing systems, as well as built-in anti-microbial technology.

Auto showrooms are now more than ever, portals into the car brand. Customers want to take their business to a professional and comfortable atmosphere where they can put their trust. As those brands mature, they develop touch points unique to the brand to differentiate from the next brand. These mandates can encompass everything from the exterior façade to the colors of the interior walls to the floors and furniture where customers wait for service. Open floor plans bring new life to car selling, creating a transparency between your business and your customers. Service and customer lounge areas need to be bright, clean, inviting and comfortable – providing café style amenities that today's automobile customers expect. Dedicated LATICRETE Strategic Account Specialists provide value engineered pre-construction planning through our product system specification support and includes jobsite installation support ensuring grand openings are successful for years to come.

- Ready for SLU or finished flooring in 3-4 hours
- Saves time and labor
- Easy-to-use with hardwood, vinyl, rubber, carpet, tile and stone

Self-Leveling and Underlayment Systems

NXT® Primer

- Deep penetrating formula maximizes bond strength
- Multi-purpose and can be used on a wide range of substrates

NXT Level Plus

- High quality cement based self-leveling underlayment for use in leveling interior plywood, OSB, gypsum and concrete substrates
- Install from 1/8" – 1 1/4" (3–32 mm) in a single lift
- Apply directly over concrete with RH of 100% or less per ASTM F2170
- Fiber-reinforced

Sound Control

170 & 170.5 Sound & Crack Isolation Mat

- This acoustical floor underlayment muffles impact noises through ceramic tiles, stone and other hard surfacing materials while protecting tile from crack disfiguration
- Comprised of 89% post-consumer recycled content*, it contributes to LEED credits, is eco-friendly and GREENGUARD certified

- 170.5 has a Delta IIC rating of 22 per ASTM 2179 Delta Impact Insulation Class exceeds code requirement through independent testing
- With an IIC rating of 50, it is approved for Commercial Use per the International Building Code

Epoxy Adhesives

LATAPOXY® 300 Adhesive

- Ideal for installing moisture sensitive marble and agglomerate tiles
- Maximum chemical resistance
- Superior bond strength

LATAPOXY BIOGREEN™ 300 Adhesive

- Made with biobased, sustainable materials
- Ideal for installing moisture sensitive marble and agglomerate tiles
- Maximum chemical resistance
- Superior bond strength

LATAPOXY 310 Stone Adhesive

- A two component, high strength epoxy adhesive, which is formulated for the spot bonding method of tile and stone installations on vertical surfaces
- Fast Permanent Bond—45 minutes to 1 hour set time
- Easy to Use—1:1 mixing ratio by volume
- Non-Staining—ideal for white and light colored marbles, other stones and tiles
- Non-Sag—when applied up to 1" (25 mm) thick
- Rapid version available for faster curing

Floor Warming System

STRATA_HEAT™ System

- High quality, single source, radiant floor heating solution that delivers exceptional performance and durability
- Energy efficient and easy-to-install with flexible layout options
- Your choice of two Wi-Fi capable thermostats
- Patent pending thin-set additive utilizes Thermal Diffusion Technology™ which helps to eliminate cold spots and optimizes efficiency

Uncoupling Mats

STRATA_MAT™ and STRATA_MAT XT®

- Designed to replace traditional underlayment materials
- For use under ceramic tile and stone installations, for both residential and commercial applications
- Eliminates transmission of in plane substrate cracks of up to 1/8" (3 mm)
- Rated Extra Heavy per TCNA as tested using ASTM C627 (for STRATA_MAT only)
- At 5/16" (7.9 mm) thick STRATA_MAT XT helps to create an even transition between typical 1/4" to 3/8" (3 to 9 mm) thick tile and 3/4" (19 mm) thick hardwood flooring

Membranes

FRACTURE BAN™

- Provides anti-fracture/sound reduction in one convenient easy to install product
- Prevents in plane cracks up to 3/8" (9.5 mm)
- Achieves an extra heavy commercial rating ideal for interior installations

- Available in 2 different thicknesses: 40 mil and 90 mil

Masonry Veneer Installation System (MVIS)™

MVIS™ Air & Water Barrier

- Single component, load bearing, fluid applied membrane
- Designed for use as a waterproofing, crack isolation, and air barrier behind most exterior wall claddings
- Excellent bond strength to a wide variety of substrates
- Exceeds ICG-ES AC 212

MVIS Veneer Mortar

- For interior and exterior installation of adhered masonry veneer, natural stone, and thin brick
- Exceeds ASTM C270 compressive strength requirements for masonry veneer installations

MVIS Premium Pointing Mortar

- Ideal for floors and walls (joint widths 1/4"–1/2" [6.35 mm–12 mm])
- Designed for exterior and interior use
- Provides a joint that is dense, hard and durable
- Available in 9 colors

HYDRO BAN® Shower Installation Systems

HYDRO BAN®

- Liquid applied, thin waterproofing membrane that combines performance and productivity
- Anti-fracture protection of up to 1/8" (3 mm) over shrinkage and other non-structural cracks
- Bonds directly to most commonly used material

HYDRO BAN Board

- Lightweight, ready to tile wall board
- IAPMO approved – for steam showers/rooms as single membrane
- Works in conjunction with LATICRETE® tile and stone installation materials
- Board thicknesses range from 1/4" to 2" (6.35 mm to 50.8 mm)

Grouts

PERMACOLOR®

- Improved stain resistance
- Consistent color
- Fast setting
- Equipped with Microban® antimicrobial product protection
- Ideal for residential and commercial applications

PERMACOLOR Select®

- No sealing required – equipped with STONETECH® Sealer Technology
- Fast setting – ready for foot traffic in as little as 3 hours
- Equipped with Microban® antimicrobial product protection
- Available in 40 colors plus top competitor colors
- Also available in over 10,000 colors with the PERMACOLOR Select ANYCOLOR™ program
- Available in non-sanded option (PERMACOLOR Select® NS)

Thin Bed Mortars

257 TITANIUM™

- The ultimate, lightweight, polymer fortified, thin-set mortar that is ideal for the installation of Gauged Porcelain Tile (GPT) and Gauged Porcelain Tile Panels/slabs (GPTP), porcelain and glass tile as well as exterior and submerged applications
- Contains no respirable crystalline silica levels that exceed the OSHA action level*

254 Platinum

- Premium, polymer-fortified, thin-set mortar that provides unsurpassed strength and versatility
- Ideal for interior, exterior and submerged applications on virtually all substrates and applications

Premium Mortar Bed

3701 Fortified Mortar

- Premixed – no job site blending of powders required
- High strength formula

3701 Lite Fortified Mortar

- Lightweight
- Silica Free

HYDRO BAN Sheet Membrane

- ASTM E96/E96M Procedure E-0.06 Perms, and IAPMO approved – for steam showers/rooms as single membrane
- Complete line of accessories – such as seam tape and inside and outside corners

HYDRO BAN Pre-Formed Benches, Seats and Niches

- Waterproof and ready to tile
- Lightweight and durable
- Easy to install with LATICRETE premium setting materials

HYDRO BAN Pre-Sloped Shower Pans

- Factory installed, code approved waterproofing meets IAPMO-PS-46 and ANSI A118.10 requirements
- Comes with a factory installed drain/waste line connection and drain assembly
- Pre-sloped, ready-to-tile pan

HYDRO BAN Bonding Flange Drain

- Eliminates pre-slope and primary shower pan for a faster installation
- Compatible with 3701 Mortar Bed and HYDRO BAN® providing a complete waterproof assembly
- Bonding flange available in both ABS and PVC

HYDRO BAN Linear Drain

- Low profile design is ideal for large format tile and stone
- Allows for placement along walls and intermediate locations
- Adjustable grate height allows for range of tile or stone thicknesses
- Available in a number of different sizes and finishes

Epoxy Grouts

SPECTRALOCK® 1

- Strongest pre-mixed grout on the market – Meets ANSI A118.3*
- SPECTRALOCK 1 outperforms traditional pre-mixed grouts currently available
- Locks in color and blocks out stains
- Available in all 40 LATICRETE colors
- Features built-in Microban® antimicrobial product protection

SPECTRALOCK PRO Premium Grout†

- Use in interior and exterior – perfect for fully submerged applications
- Easy to install: Never needs sealing
- Stainproof and chemical resistant
- Available in 40 colors
- Equipped with Microban® antimicrobial product protection

SPECTRALOCK 2000 IG

- Highly chemical resistant industrial grade epoxy grout
- Recommended for industrial applications and commercial kitchens
- Maximum physical strength
- Features built-in Microban® antimicrobial product protection that fights the growth of mold and mildew on grout surface

Large Heavy Tile Mortars

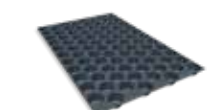

MULTIMAX™ LITE

- The ultimate, lightweight, polymer fortified, Large and Heavy Tile mortar for interior, exterior and submerged installation of ceramic tile, porcelain tile, glass tile, stone, quarry tile, pavers and brick
- Features maximum non-sag performance on walls and maximum buildup of up to 3/4" (19 mm) without shrinkage on floors
- Contains no respirable crystalline silica levels that exceed the OSHA action level*

TRI-LITE™

- High-performance, lightweight, tri-purpose mortar designed for Large and Heavy Tile, thin-bed and wall applications
- Superior non-sag, non-slump performance
- For interior and exterior applications

Plaza & Deck System

Tile Drain Mat

- Protects the tile installation from water damage and frost heaving
- Thin & lightweight, reduces dead load by 50%

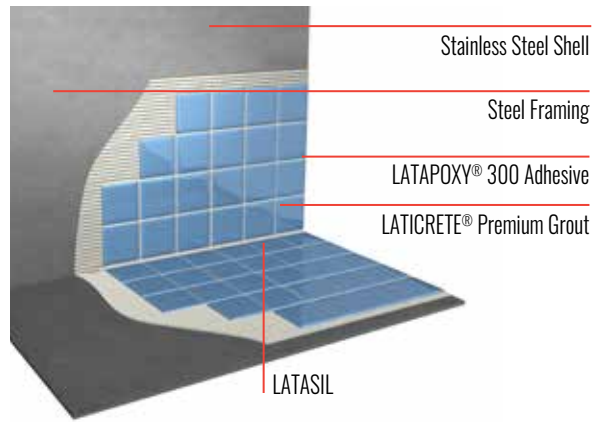

Ask your LATICRETE Strategic Account Specialist or visit laticrete.com for data about products that meet or exceed ANSI, ASTM and ISO requirements and classifications.

*United States Patent No. 6784229 (and other Patents). †Patent Pending. ‡United States Patent No. 6,881,768 (and other Patents). §United States Patent No. 6,784,229 B2 (and other Patents). *OSHA action level set forth in OSHA's Respirable Crystalline Silica (RCS) standard for construction, 29 CFR 1926.1153, as tested by an independent laboratory to be below the OSHA action level for respirable crystalline silica - see laticrete.com/silica.

System Applications

Wet Areas and Continuous Submersion System

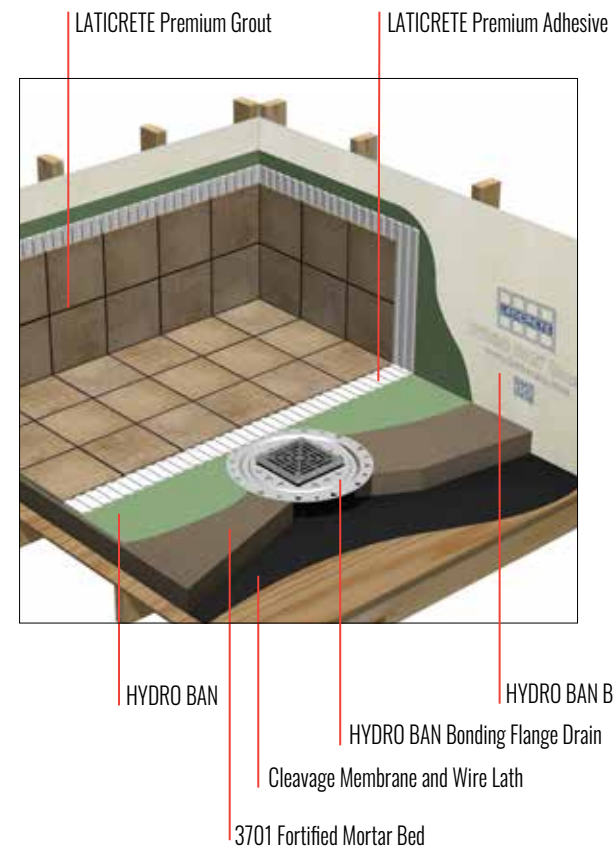

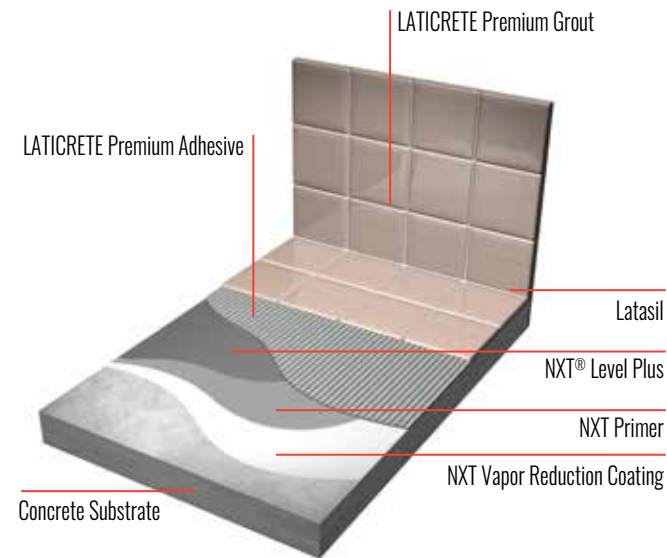

HYDRO BAN® Shower Installation Systems

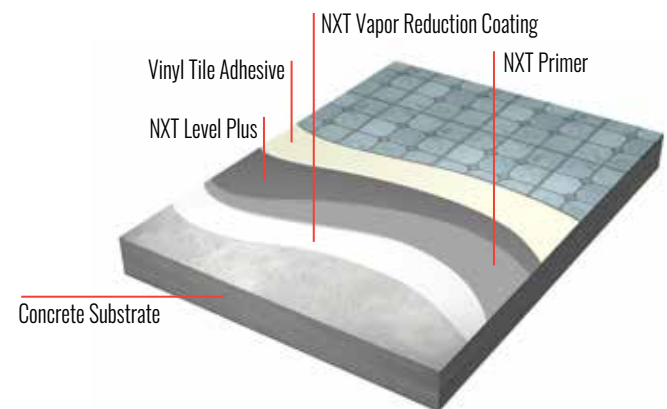

Vapor Reduction Systems

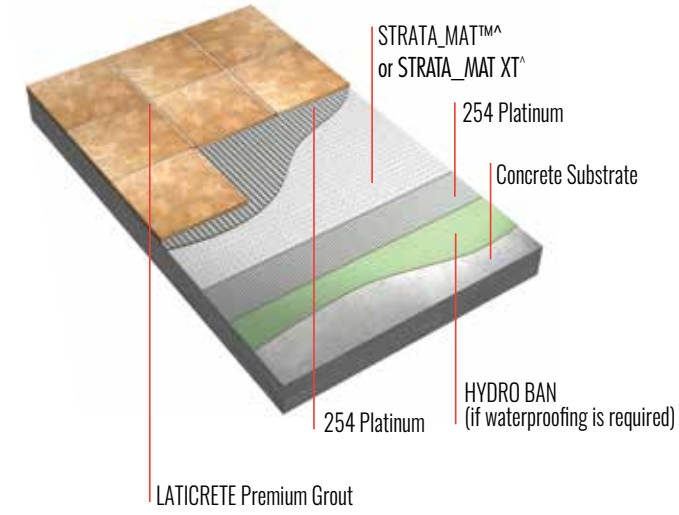

Tile and Stone System

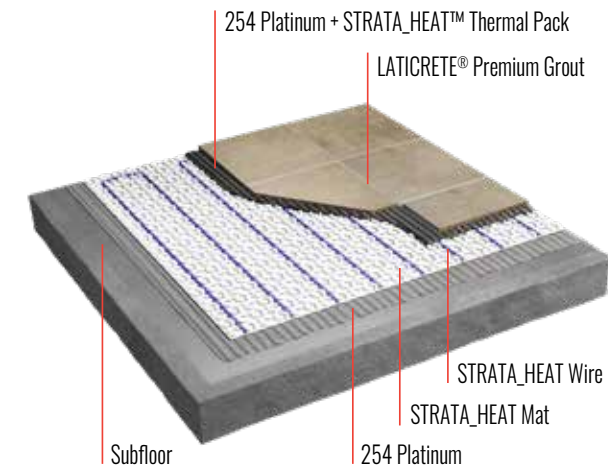

Vinyl Adhesive System

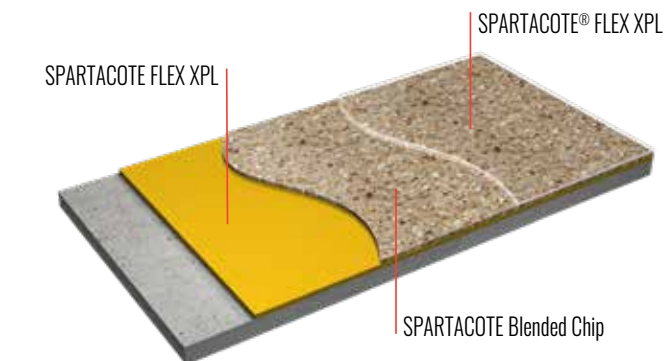

Uncoupling System

Floor Heating System

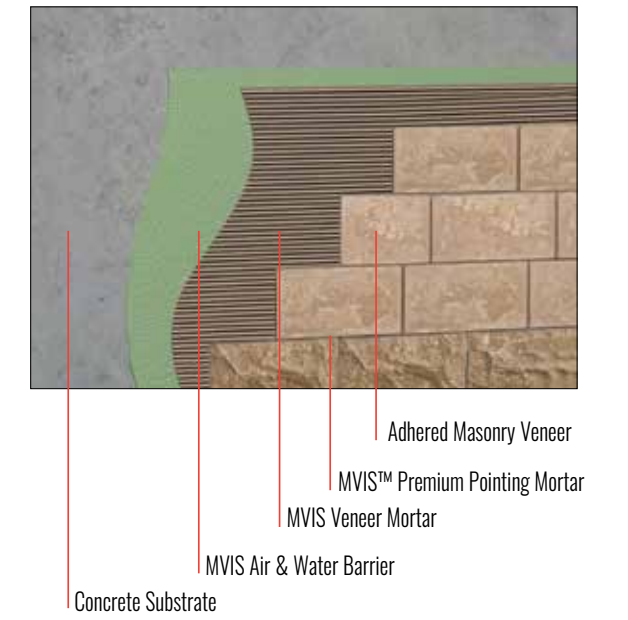

SPARTACOTE® CHIP XPL System

Masonry Veneer Installation Systems (MVIS™)

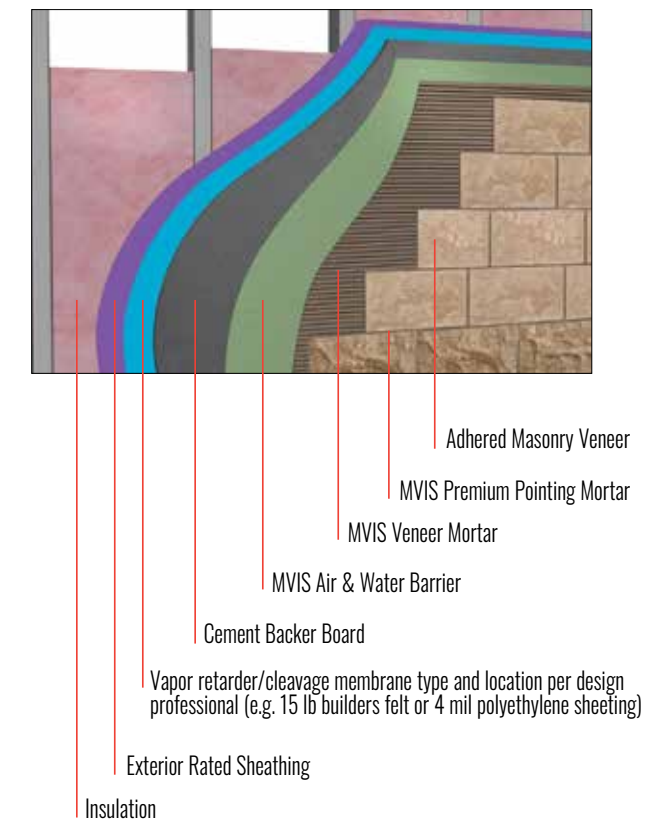

Exterior wall

Concrete wall direct adhered with fluid applied air and water barrier

Exterior wall

Framed wall with exterior rated sheathing and cement backer board

NXT® LEVEL SP - White
Premium Wear Surface with Salt and Pepper Appearance

Autostrada Club & Showroom, Westport, CT

*See DS 025.0 for complete warranty information. **See DS 230.99 for complete warranty information. *Microban® antimicrobial technology protects the treated article against mold and mildew deterioration. Antimicrobial technology is not designed to replace normal cleaning practices or protect users.
