# What to expect.

## IT'S SEALED

Concrete is a material that by nature absorbs liquids, as well as many other materials (Marble, wood, stone, etc). For this reason our sinks are sealed with the best sealant on the market.

## IT'S HAND MADE

No two pieces are the same. Each piece is made by hand and there will be differences between them. Each of our sinks is totally unique

## COLORS

Colors in concrete are seldom solid and homogeneous. In each piece there will be different shades of the same color, which give each of our products a special character.

## PORES

Pores are a natural characteristic of concrete (as well as the grain in stone or knots in wood), that is why we do not hide them, besides they give the product a special character and make it look honest.

## WEIGHT

A sink made of concrete is not essentially heavier than its comparable sink made of porcelain or similar materials. Countertops or vanities don't need any special characteristic to hold our sinks.

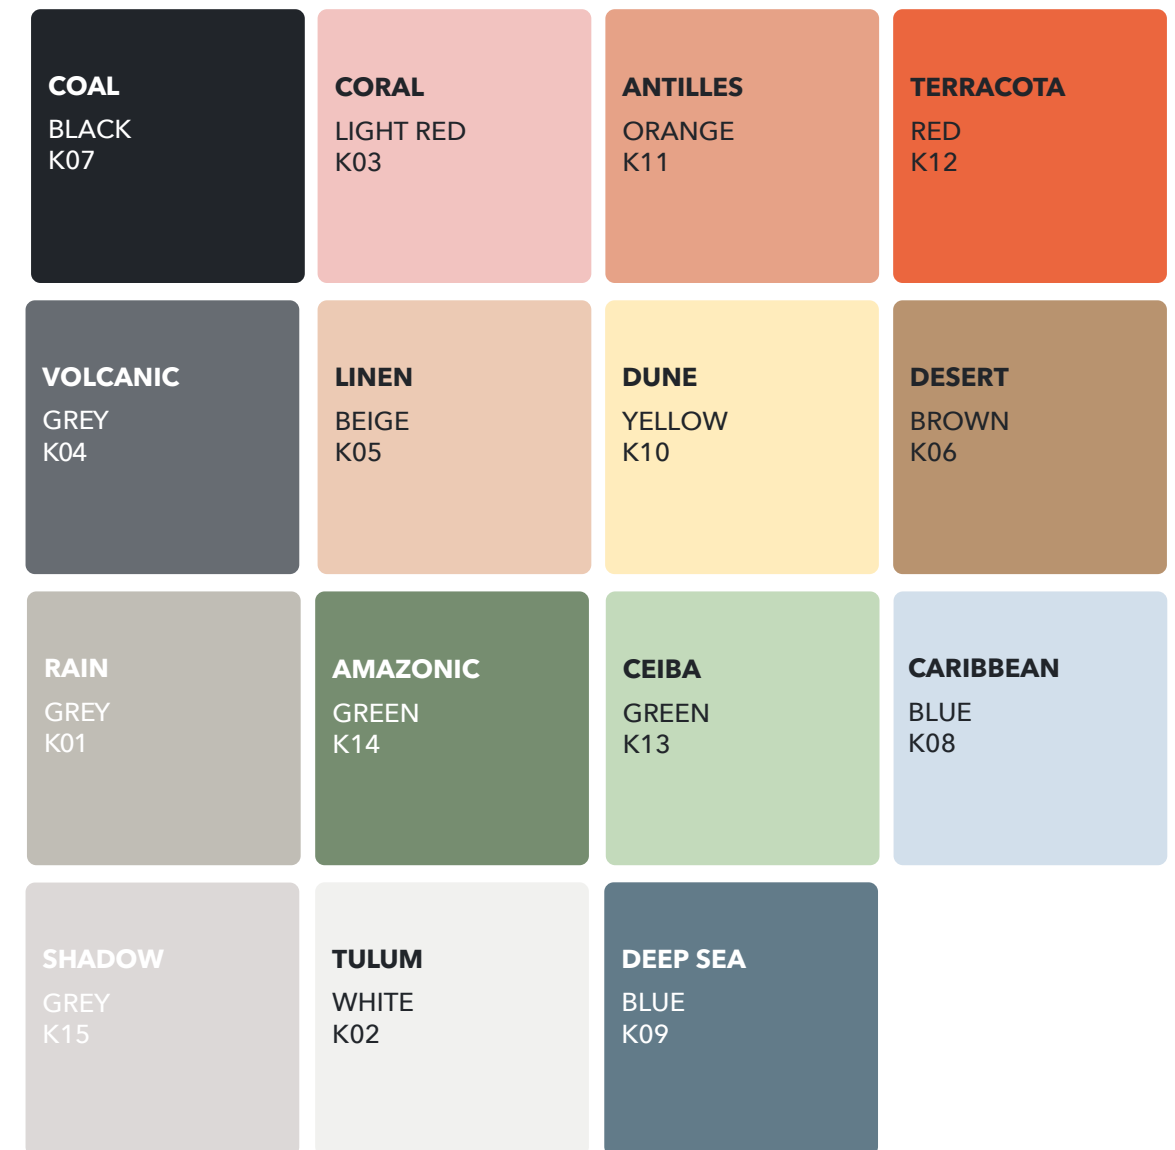

## MEASURES

Due to the way it is manufactured, the measurements of each product may have a variation of  $\pm 1/2$ ".

# We love living in colors.

Concrete is made of natural materials.

Pieces may have subtle differences in color, pores, texture or shine.

\* Actual product colors may vary from the colors shown on this piece.

\* Custom colors can be made.

# KONKRETUS

## HANDCRAFTED IN COLOMBIA

All of our products are 100% handcrafted. Each piece is made by expert hands, therefore, there will be subtle differences between them. Every single product is unique in its own way.

## FREE SHIPPING

Freight is included in the price for the continental USA. Hawaii, Alaska, and Puerto Rico may carry additional freight costs.

## LEAD TIME

For products in stock: Shipment within 3 business days, plus delivery time.  
For products not in stock: 5-6 weeks shipping time, plus delivery time

## 15 COLORS

Stock colors & the possibility of customizing.
