MOOREANDGILES.COM

furniture made
JUST FOR YOU

Say hello to the Moore & Giles furniture collections – hand-made and never mass-produced. Each solid-wood frame is meticulously covered in a leather of your choosing. This freedom opens a world of possibilities for your projects, and we're happy to extend trade-pricing to you as a designer.

LEATHER SINCE 1933 | [MOOREANDGILES.COM](https://www.mooreandgiles.com)

the TRAYNHAM COLLECTION

The Traynham collection is a commanding addition to any room. Neither overstuffed nor bulky, its confident and comfortable heft is derived from a reinforced frame of kiln-dried maple and walnut, a well-cushioned seat, and a generous measure of natural leather.

MADE IN THE USA | Trade pricing available. For a current list of leather selections, please visit mooreandgiles.com

Frame Material: Solid Maple Wood

Cushions: The ultra-down seat cushions consist of a 2.3 density ultra-cell foam core encased in a sewn cotton/polyester blend cover that contains a down, feather, and fiber mixture. The ratio for the mix is 50% fiber and 50% down and feathers. The 50% down and feather mix is 25% down and 75% feathers. All foam for seats, backs, and internal parts do not contain added flame retardants. All foams are CAL-117-2013 compliant and do not contain PBDE's or formaldehyde.

the MERIWETHER COLLECTION

Our Meriwether collection is equal parts imperial and inviting. The clean lines and modern details are eye catching in their stateliness while vast swathes of rich leather and oversized cushions are hard to resist and perfectly calibrated for lounging. Handmade in North Carolina, the solid wood frame, beautiful top stitching, and durable support has a solidity you can not only feel but capitalize on in useful ways.

the HAMILTON COLLECTION

Our Hamilton collection is the perfect addition to any seating arrangement. On both the chair and sofa, the cushions are surrounded by a dynamic frame for an effect that is clean and uncluttered while remaining cheerful and inviting. The show-stopping swoop of the arms is simultaneously traditional and contemporary, a complement to wingback chairs and clean-lined Danish styles alike.

the GARLAND COLLECTION

The gently curved sides of the Garland collection are like open arms, inviting you in to have a seat and stay for a while. Handsome from any angle, the Garland is at home in spaces both classic and contemporary. Each piece is made to order in North Carolina and upholstered in the leather of your choice from our wide array of color and texture options. Down cushions with a foam core sit atop eight-way hand tied springs and a solid hardwood frame. Comfort and taste commingle effortlessly here.

33 CHAIR

Our 33 chair is a tailored showcase for the leathers we pull from the most exclusive shelf of our expansive leather library. Construction details—from the hand-built frame in a mix of southern pine and birch to the down-wrapped foam seat cushion and handset brass nails—mirror the inimitable quality of the leather.

the JEFFERSON STREET COLLECTION

Jefferson Street runs through the heart of downtown Lynchburg and was Moore & Giles' first home base. In homage to the ninth decade of business, our armchair blends modern style and classic elements into a generation-spanning design. Handmade in North Carolina with a maple wood frame and supportive cushions wrapped in natural leather, this chair was built with its own legacy in mind. Like its namesake, we intend for this Jefferson Street Armchair to be a comfortable perch for decades to come.

SPENCER DINING COLLECTION

The elegance of the Spencer dining room chair is derived from its restrained design and luxury materials. A fully upholstered back and seat warm up the chair's crisp modern lines while subtly tapered walnut legs speak to the handmade quality. Underneath the leather of your choice is a frame of solid maple and a combination of down, poly, and foam padding for a supple but yielding seat. At home in any style dining room, the Spencer makes a finely tailored addition to your table.

MADE IN THE USA | *Trade pricing available. For a current list of leather selections, please visit mooreandgiles.com*

Weight Limit: 450 lbs | Product Weight 20 lbs

Frame Material: Solid Walnut Wood

Cushions: The frame is comprised of layered hardwoods internally and solid walnut on the exterior. The cushion has a 2.5" supportive foam core topped with a 1" soft batting for added comfort and to create a gently crowned seat. CAL-117-2013 compliant..

SPENCER DINING CHAIR
34.5"H x 21.5"W x 20.5"D

SPENCER DINING ARMCHAIR
34.5"H x 21.5"W x 20.5"D

PERCIVAL SIDE CHAIR

The Percival side chair is designed for leisure, and built for longevity. The well-cushioned seat is bracketed by sinuous side rails that make the seat feel spacious despite the trim footprint. The exposed walnut frame is carved into gentle curves that echo the graceful lines of the seat. Statement-making without being room-defining, the Percival lends both comfort and liveliness to any living space.

KEMPER CHANNELED SLIPPER CHAIR

Neatly stitched channels add a modern edge to this heirloom-quality chair. Made to order in North Carolina, the Kemper is eye-catching—with its ample proportions, handsome walnut legs, and the aforementioned channels—without dominating the room. Though the solid wood frame, slightly arched back, and down-wrapped foam core cushion will certainly make it a house favorite.

ISABELLA STOOL

The distinctly bowed back and rakishly angled legs make the Isabella stool as visually arresting as it is comfortable. With many leather options to choose from, the well-cushioned seat and supportive backrest contrast beautifully with the elaborate walnut frame and protective stainless steel kick plate. Available in two heights, Isabella will add a sculptural touch to your bar or counter. Handmade in Virginia.

Available in Two Heights: Counter and Bar

Shown in Mont Blanc Adriatic

DAHLIA STOOL

You'll want to stay awhile in the sinuously curved seat of the Dahlia. Perched atop a structural, solid walnut base, the seat is like a diamond in a cathedral setting, showing off the luxurious color and vibrancy of the leather from all angles. Available in two heights, the Dahlia is a showcase of the proportions and perfect angles needed to make a stool sit like a lounge chair. Handmade in Virginia.

OAKLEY PILLOWTOP BENCH

The crisp, interlocking shape of the solid walnut base has a mid-century feel while the tightly upholstered bench and downy pillow-top showcase expert upholstery techniques of North Carolina's best craftsmen. Comfortable to sit in and sized to fit anywhere, the Oakley looks great on its own or in multiples.

RANDOLPH GRAND OTTOMAN

The Randolph Grand Ottoman is a statement addition to any room while also being slyly multipurpose. With its generous size, comfortable top, and sturdy construction, it's ready to do the work of a daybed, bench, or coffee table. The meticulous pleats add an unobtrusive dash of style while underscoring a small portion of the incredible talent and skill poured into this piece. Each ottoman is handmade in North Carolina using firm but comfortable cushion and a robust walnut frame.

All foam for seats, backs and internal parts do not contain added flame retardants. All foams are Cal-117-2013 compliant and do not contain PBDE's or formaldehyde.

No. 1

DUST

Dust periodically. Dust is a drying agent for leather.

No. 2

LIMIT DIRECT SUNLIGHT

If possible, place leather furniture out of direct sunlight. Sunlight can fade any natural product. Leather is no different.

No. 3

CONTAIN THE STAIN

For spills, contain as quickly as possible. For stubborn stains, clean using the Moore & Giles leather cleaner.

LEATHER CARE GUIDE

What are best practices for caring for leather furniture—simple strategies that a homeowner can employ daily, weekly, monthly, and yearly?

FROM DAY ONE

Select a leather that will last. Real, natural leather will wear in and not wear out.

DAILY

Change your mindset! Many treat investment leather furniture pieces with kid gloves, but good leather will take on unique character over time, and begin to slowly patina and take on the life of the owner. Think about your favorite pair of denim jeans.

MONTHLY

Dust is the enemy! Dust absorbs moisture and will cause your leather to dry out and crack. To counteract, periodically dust with a dry cloth.

AS NEEDED

Cleaning: Less is more! First rule is do no harm. Simply blot the stain immediately with a dry rag to absorb all moisture. Avoid rubbing the leather and spreading the liquid. A dry white cloth will suffice in most cases. If that doesn't do the trick, add a little mild dish soap.

Scratches: If you get an undesired scratch in your leather, use the heat of your hand or a blow dryer to smooth it out. The natural waxes and oils in our natural leathers with shift and move to cover the scratch.

A patina is certainly lovely, but how can a homeowner know when to step in before leather wears so much that it's in disrepair?

Natural leather is the original performance material and is meant to endure wear and use—from pets and children alike. Simple cleaning and care will handle most concerns. If you think about it in terms of other furniture, you'll have to reupholster your fabric sofa several times over the course of your lifetime, while leather stands the test of time.

What are the best cleaning supplies to keep at home for leather furniture? Is there a particular type of tool or conditioner that's recommended?

CLEANING

We recommend a simple soap and water solution to spot clean. Avoid using abrasive cleaning agents. Instead, mix three parts water with one part mild soap, such as Ivory or Dawn dish soap. Tap or distilled water works just fine! Keep in mind, the stain will look its worst on the day of the incident, but over time, the stain will begin to disperse through the protein fibers of the hide and eventually become part of the look.

CARE

We produce our own products to clean and care for leather. To learn more please visit our website at mooreandgiles.com.

Is there a recommended placement for leather furnishings? For example, out of direct light, or at a certain distance from a heat source?

Sunlight will eventually cause leather to fade—avoid positioning your leather furniture in direct light. If your chair or sofa is positioned in direct sunlight a simple throw a blanket over the back of your furniture is an easy way to beautifully battle the sun.

It comes back to choosing well, not often. True full-aniline dyed natural leather will not peel or flake. We've all seen the cheap bonded "leather" sofas that look as if the top is wearing off the leather - this is not a true natural leather.

ABOUT OUR FURNITURE & NATURAL LEATHER

MOORE & GILES FURNITURE IS MADE-TO-ORDER IN THE USA

Our custom furniture program puts you in charge of design, allowing you to find the perfect fit for your space and style. Choose a leather and we will take care of the rest. Ask your sales associate for swatches for your desired silhouette. Swatches are available upon request.

FREQUENTLY ASKED QUESTIONS

Q. Why doesn't my furniture look exactly the same?

A. Each hide contains color variation and natural markings that we celebrate by upholstering into prominent areas of our furniture like the back and sides. Our skilled craftsmen upholster with care to ensure the features we love are showcased appropriately. We feel that natural leather is the most luxurious leather out there, so we do as little as possible to the leather, allowing it to age and wear over time as it should.

Q. What are these marks on my piece?

A. Bug bites, scratches, and stretch marks are a natural part of an animal's life. In turn these natural markings will appear in some areas of your furniture, though we are conscious not to use parts of a hide that are torn or excessively scarred.

Q. Why do parts of my piece have different colors?

A. In short, every hide accepts color a little differently. Some appear slightly darker, others lighter. We place hides of similar shades in "batches" to mitigate extreme variation. Our expert upholsterers skillfully cover each frame in a way that beautifully accentuates these natural characteristics. A flow of color from hide-to-hide (or even within a single hide itself!) is a feature of natural leather that we love and embrace. No two hides, no two pieces, are exactly alike.

Q. Will my piece scratch easily?

A. Your piece will scratch, however the waxes and oils applied to the leather work to repair those scratches over time with normal use. For more immediate repair simply use your thumb or a dry cloth to work the oils in around the scratched area, you will see a difference almost immediately. Leather is the world's oldest performance material, and we stand confidently behind its integrity. We believe leather wears in, not out. The natural markings you see upon delivery of the piece make it unique; the look and wear it acquires over time make it yours.

Q. Is my furniture well-built? (What's under the leather?)

A. Our solid wood frames are handmade in the United States by craftsmen who have been in the furniture industry for years. They are sturdy and designed to wear evenly over time, and down cushions in each piece provide a comfortable seat that restores its shape when unoccupied. The meticulous construction and natural leather pair to create a piece that is just as much art as utility.

Q. How will my piece age over time?

A. The wearing in of your furniture depends on where and how often you use it. A piece used only on special occasions will age slower than one used every day. Even putting a chair closer to a window or fireplace will affect how quickly and apparently the wearing occurs. Natural materials change within their environment, and natural leather is no different. With use, you will see high-touch areas like armrests, cushions, and chair backs start to burnish beautifully. These are multi generational pieces that help tell the story of the person who lived with it. They are much more likely to be passed to a child or grandchild than thrown in a landfill.
