Native Woods Shiplap

Highlighting nature's woodgrain

Native Woods Shiplap

Bring nature's beauty home with UFP-Edge Native Woods shiplap. This tongue and groove wood cladding will make a stunning impression on walls, ceilings and on select covered exterior applications like soffits and porches.

Natural and Colorful

The inherent beauty of Native Woods shiplap is in the native knots and grain of the wood. Each board features a unique woodgrain pattern beneath a smooth surface. Available in natural or colorful prefinished options, Native Woods lets you create a custom look in less time when compared to painting or staining at the jobsite.

Precise Profiles

Select from tongue and groove nickel gap joint or a WP4 V-groove joint. The interlocking board pattern allows for a consistent gap and a more secure installation with fewer exposed fasteners. And because every board is end-matched, installation requires fewer cuts for less waste.

Key Features

- 1x6 6-pack kits in a variety of lengths up to 16 ft.
- WP4 (V-groove) or nickel gap reveal
- Interlocking pattern requires fewer exposed fasteners
- Prefinished to reveal the native woodgrain
- End-matched requires fewer cuts
- Perfect for interior walls and ceilings
- Use on select covered exterior applications
